

Parafriicta[®]

Unique Solutions to Friction & Shear related Pressure Ulcers

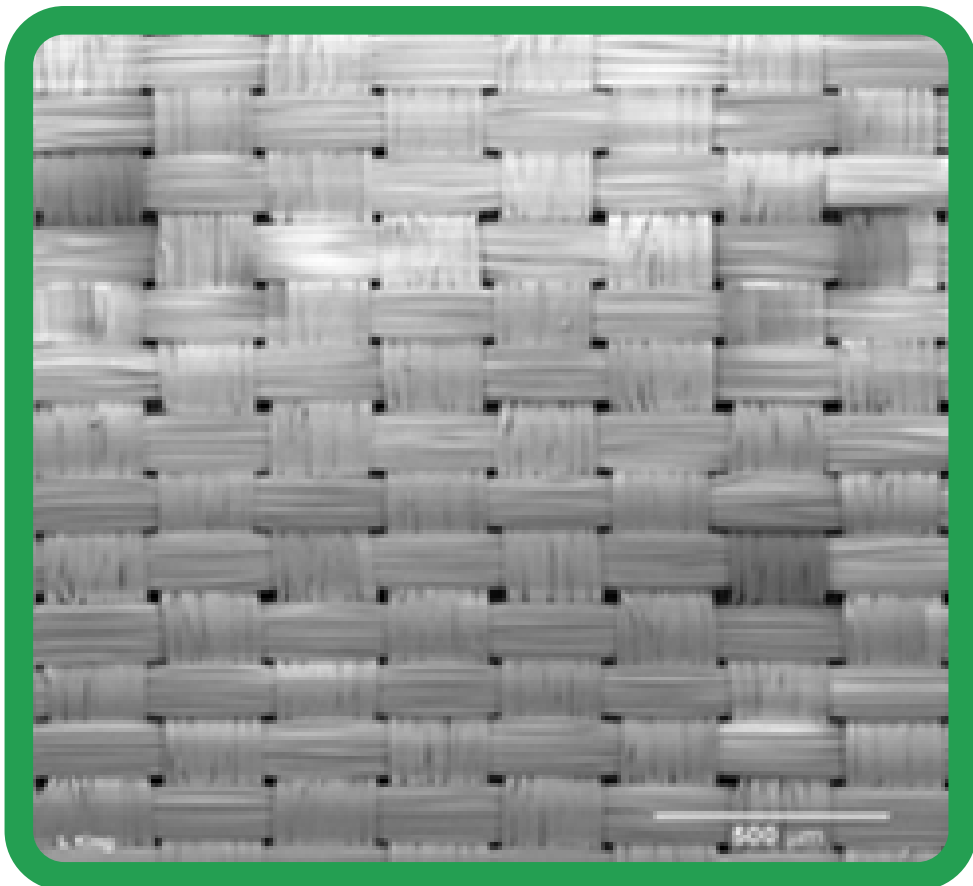

Used for the prevention and treatment of pressure ulcers.

The unique proprietary fabric reduces the risk of friction and shear-related skin breakdown by protecting the feet and ankles (Particularly the heels).

Parafriicta Fabric

Polycotton Sheet

The National Pressure Ulcer Advisory Panel recommend practitioners 'consider the use of silk-like fabrics rather than a cotton or cotton blend to reduce shear and friction'
(National Pressure Ulcer Advisory Panel 2014)

Cost of Pressure Care to the NHS

The cost of pressure ulcer care is 4% of total NHS expenditure. (G. Bennet et al, 2004)

More than 90% of pressure care treatment cost is nurse time. (Dealey, Posnett and Walker, 2012).

A pressure sore worsening from Cat 1 to cat 2 increases costs by 300%. (Improvement.nhs.uk, 2019).

On average 2,000 pressure ulcers are newly acquired each month within the NHS in England.

Sizing Chart of Parafricta Boots

Size	Longest Toe to Heel Length	Approximate UK Shoe Size Range	NHSSC Code Slip On	NHSSC Code Velcro - Adjustable
XS	24cm	2 - 3½	TLC 922	TLC 917
