

SUPERIOR EASE OF USE AND COMFORT

G+N anti-embolism stockings help to prevent the formation of Deep Vein Thrombosis (DVT) in the legs by applying clinically proven graduated compression.^{1,2} G+N anti-embolism stockings are designed to be simple to fit and apply, which reduces sizing errors and nursing time.

DUOFIT™ technology provides a two-way stretch for easier application.

Improved inspection hole design and placement for superior comfort.

Single ankle measurement reduces nursing time when measuring patients.

Available in below knee and thigh length.

Six sizes within each length reduces inventory.

Anti-bacterial fabric for odour management.

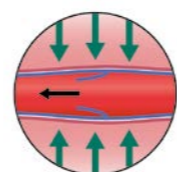

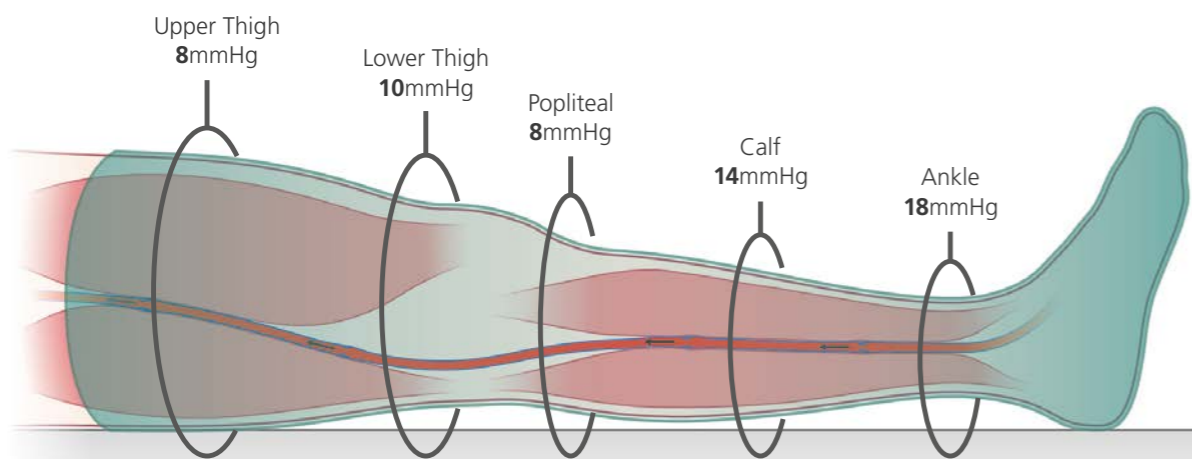

Colour coded packaging reduces time identifying correct size.

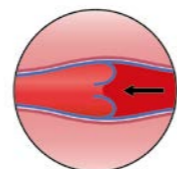

HOW DOES IT WORK?

The compression within the garment is highest at the ankle and reduces further up the leg. Pressure forces blood back towards the heart.

With G+N anti-embolism stockings

Without G+N anti-embolism stockings

INTELLIGENT SOLUTIONS FOR DVT PREVENTION

With only 6 sizes within each style, G+N anti-embolism stockings allow hospitals to benefit from a reduced inventory - saving space in stockrooms and nursing time when identifying the correct size.

Only 6 sizes
with colour coded
packaging
